Work Experience

AI Developer, INFINIQ, Seoul
Sep 2025 – Present
Working as part of the model development team.
- Developed Crowd Density Estimation System.
- Developed Construction Safety hook detection System
- Detection of human on top of truck for construction site safety.
- Developed ROI tracking and remapping for live cctv video feed
- Voice Personal Information De-identification for call centers.

Research Assistant, Dongguk University, Seoul
May 2025 – Jul 2025
Affiliation: ML Lab, under the supervision of Professor Kim Jihie.
Publications:
- Intent-aware Data Augmentation by Leveraging Generative AI for Stress Detection in Social Media Texts, PeerJ Computer Science. DOI: https://doi.org/10.7717/peerj-cs.2156 (IF: 3.8, SJR: Q1)
- Stable Emotion: Measuring Cultural Consistency and Bias in AI-Generated Emotional Expressions (Under-review)

Patent:
- Scalp Image Stitching Using Follicle-Based Rotation-Aware Descriptors (patent granted in south korea) - In Collaboration with AramHuvis
- Intention recognition data augmentation method for improving emotion judgment accuracy of AI model and AI model learning method for improving emotion judgment accuracy

Teaching Assistant, Dongguk University, Seoul
Sep 2024 – Feb 2025
Affiliation: Assisted Professor Kim Jihie.

AI Research Engineer, HealthHub, Seoul (Remote)
May 2021 – Dec 2022
Worked on a range of AI-based research projects as part of the R&D Team.
Research Areas: Machine Learning, Computer Vision, Image Processing, Medical Imaging, NLP, Data Analysis, and Deep Learning.
Projects:

- Physical Properties Prediction in Thermal Insulation and GDL Materials (Collaboration between healthhub.kr and Hyundai-Kia Motors R&D Center)
- Named-entity recognition in Electronic Health Records (Harvard Medical School n2c2 challenge)
- Cervical Spine Segmentation
- Teeth Segmentation
- Facial De-identification in Head CBCT, CT, and MRI scans
- Smart-Fit - Object detection in X-ray Scans

Education

Master's in Artificial Intelligence, Dongguk University, Seoul
Mar 2023 – Feb 2025
Thesis: Perspective-driven data augmentation utilizing generative AI for stress detection in social media posts.
GPA: 4.25/4.5

Bachelor's in Electrical Engineering (BE EE), College of Electrical and Mechanical Engineering (CEME), National University of Sciences and Technology (NUST), Rawalpindi
Oct 2016 – Jul 2020

Thesis: Semi-Automated Annotation of LIDAR point cloud for vehicular data (Role: Annotation of data and training MASK-RCNN for vehicle identification in RGB images).
GPA: 2.75/4

Internship

Intern (Telecommunication), PTCL, Faisalabad
Jul 2018 - Aug 2018

Intern (Electrical Engineering), Aircraft Rebuild Factory (ARF), Pakistan Aeronautical Complex, Kamra
Jun 2018 - Jul 2018

Intern (Biomedical Engineering), Punjab Institute of Nuclear Medicine (PINUM), Faisalabad
Jul 2017 – Aug 2017

Volunteer Work

- English conversation sessions at Seodaemun Senior Welfare Center (organized by Itaewon Global Village Center, Seoul)
- Emotional support for cancer patients at a PINUM hospital, Faisalabad
- Student Fundraiser for NUST Volunteers Club

Courses and Certifications

- Introduction to Deep Learning with Keras, DataCamp
- Introduction to Deep Learning with PyTorch, DataCamp
- Complete Guide to Creating COCO Datasets, Udemy
- Microsoft Office Specialist 2013 (Word, Excel, PowerPoint)
